Abdul Basit

PROFESSIONAL SUMMARY

Dynamic and skilled software developer with expertise in .NET, Blazor, C#, and React.js, complemented by proficiency in Node.js, HTML, CSS, Python, SQL, C++, and JavaScript. Demonstrates strong problem-solving abilities and a commitment to IT security practices within web development projects. Adept at team collaboration and UI design basics, with a foundational understanding of networking. Aspires to leverage technical skills to drive innovative solutions in software development.

WORK HISTORY

- Web Development Intern**
PointOfIT

07/2025 – 08/2025

 - Developed and maintained web applications using the .NET framework and Blazor.
 - Collaborated with the development team on front-end and back-end tasks.
 - Built responsive UI components using HTML, CSS, and C#.
 - Participated in code reviews and followed agile development practices.
- Intern**
ZTBL – IT Security Department – Islamabad

06/2024 – 07/2024

 - Gained hands-on experience in IT security practices and documentation.
 - Observed internal auditing procedures and security compliance methods.
 - Learned how projects are managed and deployed in the financial sector.

EDUCATION

- BS: Computer Science**
Air University – Islamabad

01/2022 – current

 - Currently in 6th semester. Focused on practical development and project-based learning.
 - Relevant coursework: Data Structures, OOP, Web Technologies, Database Systems, Networking.

PROJECTS

- Library Management System**

Tech: C#, ASP.NET Core, Blazor

 - Developed a full-stack web application to digitize library operations for students and faculty.
 - Implemented features including book management, borrowing/return system, and resource sharing.
 - Built RESTful APIs using ASP.NET Core and integrated them with a Blazor frontend.
 - Focused on clean architecture and scalable design.

<https://github.com/AbdulBasit0909/library-management-system>
- Sign Language AI Suite**

Tech: Python, Machine Learning, Computer Vision

 - Built an AI-based system for real-time sign language recognition.
 - Trained a classification model on gesture datasets for accurate predictions.
 - Integrated text-to-speech functionality to convert recognized signs into audio output.
 - Applied computer vision techniques for gesture detection and processing.

<https://github.com/AbdulBasit0909/SignLanguage-AI-Suite>
- Quiz Mobile Application**

Tech: Flutter, Dart

 - Designed and developed a cross-platform quiz application with a user-friendly interface.
 - Implemented multiple quiz categories and dynamic question handling.
 - Focused on responsive UI/UX for smooth user experience.

♦ **User Monitoring System**

Tech: Python

- Developed a system to monitor and display user activity in a networked environment.
- Implemented basic tracking and logging mechanisms.
- Focused on real-time data observation and system behavior analysis.
